**Capabilities:**

Inomedic Health Applications, Inc. (IHA) is a WOSB headquartered in Hampton, VA. We are dedicated to providing ultramodern medical and environmental health services for federal, state, and commercial organizations in support of base/facility operations. The unique aspect of our services is its diversity and integration designed to optimize safety, health, and environmental protection for our clients.

**Medical Services** - IHA provides comprehensive occupational and aerospace medical services to ensure employee safety and health through prevention and treatment of injuries, illnesses, and musculoskeletal rehabilitation. We establish medical standards, address work-related physical demands for various occupations, potential workplace hazardous exposures and regulatory (e.g., OSHA) requirements. IHA has experience operating multiple clinics including comprehensive occupational and preventive health clinics, a university student health center and contingency walk-in treatment clinics for emergency support. We have led the implementation and on-going support of an agency-wide health information system.

We provide Employee Assistance Programs (EAP), ergonomic evaluations, health education and fitness center operations. IHA has experience in writing and supporting plans for medical emergencies, such as epidemics, mass casualty events and contingencies requiring incident command system operations.

**Environmental Health Services** - IHA industrial hygienists, health physicists, and public health experts specialize in the recognition, evaluation, and control of a wide range of chemical, biological and physical hazards. Our experts provide consultations and in - the field assessments resulting in real time reporting formats for use by workers, supervisors, safety managers, legal and organization executives. IHA industrial hygienists monitor asbestos and heavy metal abatement activities, petroleum fueling operations, emergency spill response and cleanup and other hazardous operations and recommend protective measures for OSHA compliance and health protection. Our health physicists conduct risk assessments and monitoring for radiation hazards and compliance with regulatory requirements. IHA public health experts conduct specialized investigative and advisory support on a real-time basis such as emergency response incidents affecting public health.
